GPRA CA Update Forecasting (120913) BCs version.pdf

Steve,

Would you please provide me a due date for your request, and the identification of Water Board sites, where Frank may be working in the future?

Thank you very much!

Juan

Branch Chiefs:

This email is a follow up to discussions held today during the Branch Chiefs meeting. Steve Armann, US EPA, is asking for projected (forecast) completion dates on all unscheduled GPRA CA (HH, GWC, RCC) EIs for the remaining sites. Information will be used to determine if more time (beyond 2020) is needed to achieve the GPRA goals, or if the percentage complete should be reduced (currently at 95%).

The unscheduled EIs have been highlighted on the attached GPRA Baseline. Please coordinate with your staff to populate the highlighted cells with projected dates.

	<b>HH</b>	<b>GW</b>	<b>RCC</b>
Completed EIs	230	184	119
<b>FY 2014 Commitments</b>	<b>6</b>	<b>12</b>	<b>17</b>
Unscheduled EIs*	17	44	35

\* Need PM to include a projected date in Envirostor.

FY 2014 Commitments = Red numbers

Unscheduled EI's = Yellow Highlighted cells

I will follow up with another email to provide you with a due date, and an updated GPRA Baseline identifying which sites are Water Board sites.

Please let me know if you have any questions/corrections/recommendations.

Thank you

Juan

Regards,

**Subject:** GPRA Forecasting

Juan, HQ would like us to forecast when all of our sites will meet the respective goals (HH, GW, and RC). They are considering changes to the RC goal to either allow more time (beyond 2020) or reduce the numerical percentage complete (currently at 95%). Would you please take a look at your latest projects and send me an updated copy. Thanks.
